# FCS Express 7 Cytometry

Data Analysis and Reporting Software for Image Cytometry

FCS Express ™ **7** **Image Cytometry can be used with any images in a wide variety of applications. Here are just a few examples of what *FCS Express* can do for you.**
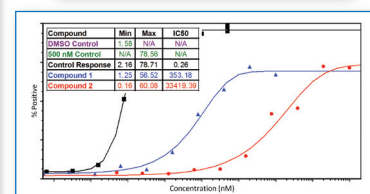

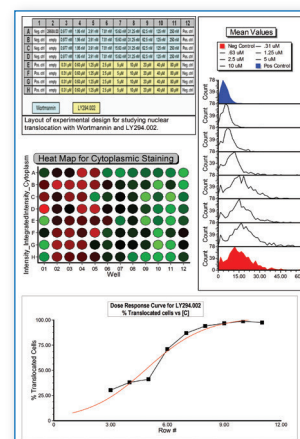

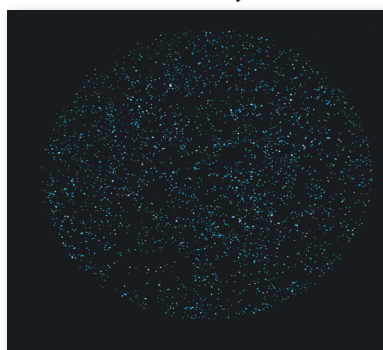

Benchtop Cytometers

Use *FCS Express* with your compatible benchtop imaging device to get results in record time.

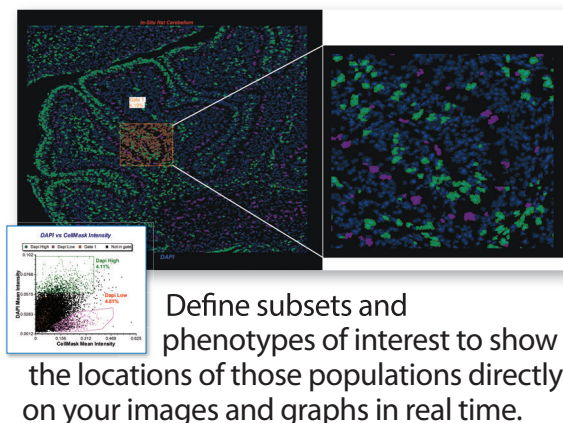

High Content Screening

Quickly process many plates worth of imaging data. Visualize your data at the global, population, or single cell level to see the results and custom statistics you need.

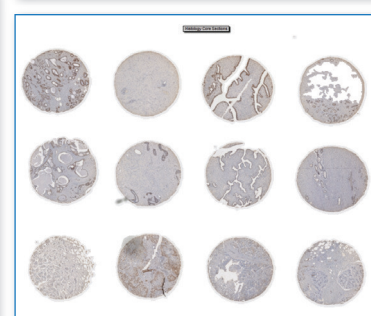

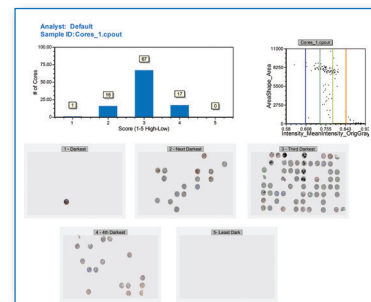

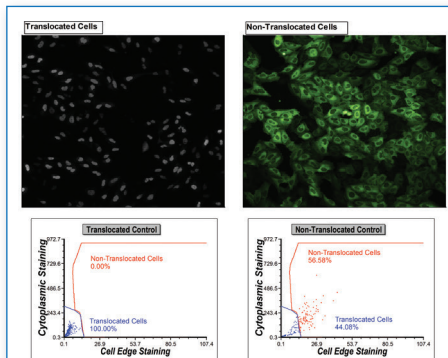

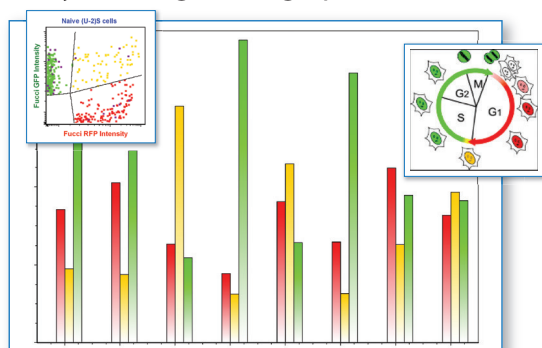

RESEARCH IMAGING, HISTOLOGY, SLIDE SCANNING AND BIO PROCESSING

Work with raw images seamlessly and in real time.

Dynamic interaction between images, plots, graphs and statistics.

Define subsets and phenotypes of interest to show the locations of those populations directly on your images and graphs in real time.
